

# APEX Peptides Review Highlights

Checked October 15–19, 2026 · Full review: [peptidestack.io/blog/apex-peptides-review](https://peptidestack.io/blog/apex-peptides-review)

## DOCUMENTARY REVIEW

### What PeptideStack checked

Public APEX pages and certificates, two laboratory-hosted reports and an October 17, 2026 coupon checkout test. We did not buy, receive or test products.

## Highlights

- **Public certificate library:** 39 certificate entries, searchable by product, order or vial lot number ([apexpepts.com/verify](https://apexpepts.com/verify)).
- **Lot numbers on product pages**, e.g. BPC-157 10mg lot APX-7317226-P.
- **Two named testing laboratories:** Freedom Diagnostics Testing and Horizon Analytical. Two reports were accessible on laboratory-hosted domains.
- **Catalog:** 77 listed products, including 53 peptides; 19 bundled stacks with stated savings of 15–20%.
- **Build a Box:** any four compounds at 35% off retail, every 30, 60 or 90 days.
- **Shipping (as APEX states):** orders by 8pm PST ship the same business day; standard delivery 3–5 business days after shipment; priority and express options at checkout; US only; plain, unbranded packaging.
- **Support:** [support@apexpepts.com](mailto:support@apexpepts.com) and 1-888-725-APEX, published in APEX's Help Center.

# PSTACK

**APEX Peptides coupon code PSTACK — 10% off eligible products.**

Checkout-tested October 17, 2026: \$8.90 off an \$89 BPC-157 10mg vial. Enter PSTACK in the Promo code field at checkout.

Shop: [apexpepts.com/p/PSTACK](https://apexpepts.com/p/PSTACK) (paid link)

## How to check a vial's certificate

1

Find the lot number printed on the vial label.

2

Search that lot at [apexpepts.com/verify](https://apexpepts.com/verify).

3

Match the compound, strength and lot on the certificate to your vial.

# Lab results summary

Five certificates reviewed: reported purity 99.25%–99.76%.

| Product and lot                     | Laboratory                                                                                          | Reported purity | Where we checked it                                                                                |
|-------------------------------------|-----------------------------------------------------------------------------------------------------|-----------------|----------------------------------------------------------------------------------------------------|
| Retatrutide 10mg, lot 60326         | Freedom Diagnostics Testing; identity confirmed (LC-MS); net content 9.48mg; reported June 29, 2026 | 99.76%          | <a href="#">Freedom Diagnostics Retatrutide certificate</a> (lab-hosted, identical to APEX's file) |
| PT-141 10mg, lot APX-2061592-P      | Horizon Analytical; report 1008117; analysis May 27, 2026                                           | 99.25%          | <a href="#">Horizon Analytical PT-141 certificate</a> (lab-hosted, names APEX Peptides)            |
| GHK-Cu 100mg, lot APX-6524116-P     | Horizon Analytical                                                                                  | 99.48%          | APEX certificate library                                                                           |
| Tirzepatide 10mg, lot APX-9109868-P | Horizon Analytical                                                                                  | 99.44%          | APEX certificate library                                                                           |
| BPC-157 10mg, lot APX-7317226-P     | Horizon Analytical                                                                                  | 99.32%          | APEX certificate library                                                                           |

Horizon reports list a >98% purity specification. Match the lot on the report to the lot on your vial.

**Verification scope:** PeptideStack reviewed publicly available certificates and checked two reports on the laboratories' own servers. The three certificates we reviewed only through APEX-hosted copies were not independently authenticated with their named laboratories. The BPC-157 certificate lists analysis on May 27, 2026, before its June 1, 2026 received date. We could not explain that discrepancy from the document alone. We did not purchase, receive or independently test any APEX Peptides product. The results apply to the submitted samples and listed lots, not to all inventory.
